

MediTracker

MEDITRACKER KEEPS YOUR PATIENTS SAFER IN A MEDICAL EMERGENCY.

Patients use MediTracker to view their GP medical summary, as extracted directly from your clinical system.

- ✓ Free for general practice
- ✓ Bank-grade information security and privacy
- ✓ Controlled data access
- ✓ Covered by major medico-legal insurers
- ✓ Quick connection for your practice
- ✓ RACGP endorsed *

RACGP

Keeping Patients Safer 24/7

MediTracker connects your patients to your general practice.

Its view-only display includes a patient's current and past health conditions, medications, allergies and test results as recorded in your practice clinical system.

With access to accurate clinical information, available anywhere and anytime, you help ensure your patients are safer on clinical handover, out of hours, on travel, and in medical emergencies.

Better Patient Outcomes

MediTracker links to Apple Health, Google Fit and devices such as blood pressure monitors and activity trackers, so patient measurements can be shared, subject to consent, with a patient's care team.

A more informed care team leads to better clinical decisions.

Get Connected

Connecting your practice to MediTracker is simple, quick and free.

To connect :

meditracker.com.au/gps/

or contact our help desk at support@meditracker.com.au to find out more.

* Endorsed as part of RACGP's endorsement of cdmNet for supporting quality improvement in general practice.
